OBJECTIVE

A react developer id responsible for building user interfaces and front-end applications using React.js, a popular JavaScript library for building user interfaces. They work closely with designers and back-end developers to implement the visual elements and functionality of web applications. A react developer should have a strong understanding of HTML,CSS, and JavaScript , as well as experience with React.js and its ecosystem, including state management libraries like Redux or context API, routing libraries like React Router, and component libraries like Material-UI or Ant Design.

CERTIFICATE

MERN Stack Developer

I have completed 4 months MERN stack development course in Vinsup Academy , Madurai.

PROJECTS

- E-Commerce Webside - Bulid Using React js
- Qr Code Generator
- Advice Api App
- BMI App
- Car showroom website

EXPERIENCE

- Assisted junior developers in designing and implementing web applications using the MERN stack.
- Collaborated with team members to troubleshoot issues and optimize application performance.
- Participated in code reviews and provided feedback to improve code quality and maintainability.
